

April 2024 Safety

April Showers and Construction Safety

April showers bring more than just flowers. Wet conditions can create a muddy surface, increasing the risk of slips and falls. Make sure to wear slip-resistant footwear and be extra cautious when navigating muddy areas.

Safety Check: Take a moment for a thorough safety check before starting your tasks. Inspect equipment, ensure proper signage for potential hazards, and report any issues.

Spring weather can be unpredictable. Keep an eye on the forecast and be prepared for sudden changes. Wind and rain can impact your work conditions, so plan accordingly.
