

October 2024 Safety

No Tricks, Just Construction Treats!

As the leaves change color, let's also change our focus to ensure a safe and successful Spooky Season on the job site.

- Fall Hazard Awareness
 - Leaves may be falling but safety standards should be rising. Keep walkways clear of all debris and use caution of elevated surfaces.
- Visibility Boost
 - Days are getting shorter. Check and replace any worn out or non-functioning lights and equipment, use reflective gear to enhance visibility.
- Health Check Ins
 - Encourage team members to monitor their well-being.
- Emergency Drills
 - Conduct emergency drills with your team. Ensure everyone knows the evacuation procedures, location of first aid kit, and emergency contact information.

Let's wrap up the construction season with a commitment to safety.
